

A validation workshop was held to close the study looking at the causes of the weak rate of investment credits consumption in Niger. The workshop brought together key players involved in public investment and the procurement system, as well as local donors. The report was subjected to a critical review by two commissions, with a particular focus on the feasibility of the action and implementation plan proposed by DFI and two national consultants. The main outcomes of the study will be officially presented to Cabinet and appropriate measures will be taken to implement the report's recommendations under the supervision of the Ministry of Planning.
