

DFI participated in a joint IMF/World Bank mission to Niamey aimed at assisting the Interministerial Debt Committee's technical commission to devise a medium-term debt strategy (MTDS) for 2016-2020. Assistance was also provided in developing an annual borrowing plan in accordance with the national commitment made with the IMF.

The key conclusion was that there is a real capacity to formulate and, above all, to evaluate the implementation of the MTDS, whose results are systematically annexed to Niger's budget bills. The MTDS was conducted in an inclusive and participatory manner and should soon be approved and validated by the Interministerial Debt Committee which is chaired by Niger's Prime Minister.
