

DFI has renewed its partnership with the World Bank and IMF to implement the Debt Management Facility, which began in 2008. The DMF provides advisory services, training and peer-to-peer learning to more than 80 developing countries around the world to strengthen their debt management capacity, processes, and institutions. DFI participates in workshops and missions to support the implementation of the programme, on such issues as Debt Management Performance Assessments (DeMPA), Debt Sustainability Analysis, Medium-Term Debt Strategies, design of Debt Management Reform Plans, and development of domestic debt markets. Since 2008, DFI has participated in more than 73 missions and workshops. For more details, see the [DMF website](#) .
