The fundamental purpose of monitoring FAL, investor perceptions and corporate responsibility is so as to analyse trends in private capital, the investment climate, global and national financial crises, and corporate responsibility; and on the basis of this analysis, to make policy recommendations to government on how to increase the scale and stability, and the development contribution, of foreign private capital.

Training materials provide guidance in how to:

- Prepare high-quality analysis (institutional arrangements, sample publication contents etc)
- Define analytical needs and key e.g. country or region specific issues
- Write an analytical report, with suggestions for presentation and analysis
- Link analytical findings to recommendations and policy action plans
